Antibiotics safe in pregnancy guidelines

Indication	Recommended Regimen	Alternative Agents	Duration
1. One or more prior episodes of BSP*	Ciprofloxacin 500 mg PO daily	Trimethoprim-sulfamethoxazole one double-strength tablet daily	Indefinite as long as infection is present
2. Primary BSP prophylaxis for patients with advanced cirrhosis who meet criteria*	Ciprofloxacin 500 mg PO daily Trimethoprim-sulfamethoxazole one double-strength tablet daily	Levofloxacin 250 mg PO daily	Indefinite as long as infection is present
3. Acute gastrointestinal hemorrhage in patients with advanced cirrhosis	Ceftriaxone 1 g IV daily	May transition to oral therapy once bleeding stops and oral intake has resumed: Ciprofloxacin 500 mg PO twice daily Trimethoprim-sulfamethoxazole one double-strength tablet twice daily	7 days total (combined IV and oral therapy)

*Patients with total bilirubin less than 3 mg/dL, and at least one of the following: prothrombin time/international normalized ratio (INR) > 1.5, albumin < 3.0 g/dL, or ascites (Child-Pugh score > 3 points and sodium < 130 mg/dL).
Should use rifaximin 200 mg bid, serum sodium < 130 mg/dL, 1 or fewer factors (Child-Pugh score > 3 points and sodium < 130 mg/dL).

Antibiotics contraindicated during pregnancy

Mnemonic: "MCAT"

M Metronidazole	C Chloramphenicol
A Aminoglycoside	T Tetracyclines

Region	Severity	First-Line Antibiotic	Second-Line Antibiotic
South Asia, East Africa	Uncomplicated	Ceftriaxone PO	Azithromycin PO
Eastern Europe, Middle East, Latin America, South America ¹	Uncomplicated	Ciprofloxacin PO or Ofloxacin PO	Ceftriaxone PO or Azithromycin PO
	Complicated	Ciprofloxacin IV or Ofloxacin IV	Ceftriaxone IV or Azithromycin IV
Sub-Saharan Africa, Southeast Asia, or Sub-Saharan Africa ²	Uncomplicated	Ceftriaxone PO or Ofloxacin PO	Azithromycin PO
	Complicated	Ceftriaxone IV or Ofloxacin IV	Azithromycin IV

Footnotes:
1. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
2. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
3. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
4. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
5. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
6. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
7. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
8. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
9. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.
10. Ciprofloxacin 500 mg PO bid for 7 days or ofloxacin 400 mg PO bid for 7 days.

Also the use of tetracyclines, when administered intramuscularly, has occasionally produced maternal liver failure erythromycin - not known to be harmful metronidazole - manufacturer advises avoidance of high-dose regimens streptomycin may cause foetal auditory nerve damage trimethoprim - this is safe after the first trimester. The weight of typical loads, the distance lifted, width of aisle space, hours of usage per day and indoor or outdoor usage are factors that determine capacity. Forklift capacity measures the weight a forklift can lift. Note that the summary of product characteristics must be consulted before prescribing any drug in pregnancy and during breastfeeding. If a forklift needs repair or is unsafe, the operator should report any issues without using it. Ongoing Training/Ongoing training for forklift operators is left to the discretion of employers. These forklifts come in two styles: stand-up and double-deep. Matthew JL. Many different types of forklifts exist, but anyone who uses this machinery will need to receive comprehensive training to ensure forklift safety. Forklift Types The type of forklift you choose depends on how you will use it. Industrial reach forklifts are common in warehouses, making it possible to access items stacked on storage pallets. These checks include examining electrical safety devices, steering, brakes, hydraulic controls, attachments, battery charge, mechanical safety devices and more. Training has to involve direct supervision by professionals who are considered experts. Formal training involves multiple learning formats, including lectures and discussions, online learning, videos and written materials. Practical training must also occur, which includes demonstrations by experts and opportunities for students to practice. Forklift Check Sheet Forklift operators should use a forklift check sheet every day as they operate this equipment. Forklift regulations require that forklift drivers be competent and must have completed full training and evaluation of their skills. MORE FROM QUESTIONSANSWERED.NET Double-deep forklifts have longer forks to load two loads at a time. Counterbalance forklifts are also common in warehouses. During Pregnancy Penicillins and Cephalosporins are drugs of choice in pregnancy and breastfeeding (1). click here You have 3 more open access pages. The tires are designed to provide greater stability, and these forklifts are faster. Side-loader forklifts have forks along side the truck so they fit into narrow aisles. Telescopic handler forklifts have a boom that provides more lifting options, making it ideal in agricultural situations. Choosing forklift capacity depends on how you plan to use the machinery. However, the sulphonamide warning applies for trimethoprim - sulphonamide preparations Breastfeeding Penicillins and Cephalosporins are drugs of choice in breastfeeding (1). Last edited 06/2020 and last reviewed 02/2021 Links: Skip to main content When moving heavy loads, a forklift is often the go-to equipment to get the job done. FREE subscriptions for doctors and students... Minimum capacities are approximately 3,000 pounds and upper capacities can exceed 50,000 pounds. This group of drugs stain developing bone and teeth in the fetus. Effect of maternal antibiotics on breast feeding infants Postgrad Med J 2004;80:196-200. Reference: NHS Forth Valley. Some have three wheels for navigating narrow areas. Rough terrain forklifts are ideal for construction with uneven terrain. BNF guidance with respect to antibiotic use in pregnancy states: penicillins and cephalosporins are safe to use throughout pregnancy sulphonamides interfere with the bile conjugating mechanism of the neonate, thus sulphonamides should be avoided if delivery is imminent tetracyclines should not be used in pregnancy. In pregnancy, avoid quinolones, tetracyclines, aminoglycosides, unless severe or life threatening infection, high dose metronidazole, trimethoprim (in first trimester - folate antagonist) and nitrofurantoin (at term - risk of neonatal haemolysis) (2). Empirical Antimicrobial Guidelines for Forth Valley Hospitals 2013-2015 BNF Appendix 4: Pregnancy. A review has stated (3): Safe for administration: aminoglycosides amoxicillin amoxicillin-clavulanate antitubercular drugs cephalosporins macrolides trimethoprim-sulphamethoxazole trimethoprim - the BNF states that '...short-term use not known to be harmful' Effects not known/to be used with caution: chloramphenicol clindamycin dapsone mandelic acid nalidixic acid nitrofurantoin - the BNF states '...avoid; only small amounts in milk but could be enough to produce haemolysis in G6PD-deficient infants.' tetracyclines Not recommended: Information about metronidazole and breast feeding is linked. Some situations that may prompt refresher training include observations of unsafe handling, an accident or a close call, evaluations that show an operator is not operating the machinery safely, a workplace change that requires different handling of the forklift or an operator having to drive a different type of forklift. Most forklifts have a load center of 24 inches, which is the horizontal distance from the front of the forks to the load's center of gravity. Forklift Safety Training Anyone who will operate a forklift needs to receive forklift safety training. The check sheet includes visual checks of components and operational checks to make sure the forklift is operating correctly and safely. These forklifts have dual forks in front for lifting and moving loads. Stand-up forklifts enable operators to lift and move one load at a time.
